

AMENDMENT TO SPECIFICATION

U.S. APPLICATION NUMBER: 10/796,497
FILING DATE: 3/09/2004
NAME OF APPLICANT: Nelson A. Merritt
TITLE OF INVENTION: Second Language Learning

Amendment by substitute Specification--The specification for the above application is amended by substitute of specification, a clean version of which is attached in accordance with the requirements of 37 CFR 1.125. A separate marked up version showing the changes in the specification relative to the previous version is also included.

Instruction to replace the specification--The Patent Office is instructed to replace the existing specification with the clean substitute specification. There are no amendments required to the drawings originally submitted. Therefore, the Patent Office is instructed to include the set of original drawings, as they were submitted originally, with the amended specification.

No New Matter Statement--The new specification does not contain any new matter.

It may be noted that the changes to the specification consist principally of corrections to formatting in the beginning of the specification, in addition to the removal of the "Other References" paragraph. This has been replaced by PTO-892, Notice of References Cited, which was prepared by the PTO and forwarded with the notice of office action. A copy

of this document is included herein for completeness. A section entitled “Best Mode for Carrying Out This Invention”, starting at page 11, is inserted in compliance with the related office action. It defines the mode of accomplishment of functions described in the original specification on page 11, paragraphs 1 to 3 as well as other paragraphs. There are three other changes of a relatively minor nature, mainly for grammatical corrections in the text and located as follows: page 3 paragraph 2, page 4 paragraph 1, page 11 paragraph 4.
